

# Sporicidin<sup>®</sup> Disinfectant Solution

Ready to Use One-Step Disinfectant Solution

## Description

Sporicidin Disinfectant Solution is an EPA registered intermediate level disinfectant for use on environmental surfaces in health care facilities, compounding pharmacies, manufacturing plants, animal laboratories, offices, schools and public venues, where broad-spectrum kill claims and surface compatibility are needed.

Sporicidin Disinfectant Solution utilizes buffered phenol, sodium phenate, and surfactants to provide both cleaning, detergency, and disinfecting in one germicidal product. While this blend of active ingredients is effective against viruses, bacteria, fungus and TB, this product is also rated by the EPA as Category III (Low Toxicity) for eye irritation and Category IV (Very Low Toxicity) for acute oral, acute dermal, acute inhalation, and skin irritation exposure studies.

Sporicidin Disinfectant Solution can provide bacteriostatic activity against odor-causing bacteria for up to 6 months on hard surfaces when the surface is undisturbed.

\*\*Double bagged and sterilized with gamma irradiation, Sporicidin Disinfectant Solution part numbers GAMMA-1284F and PS-3212FIR are ideal for compounding pharmacies and other critical environments that require sterile products. All other Sporicidin part numbers are not sterile.
