

PalWOW - Workstation On Wheels

Functional, affordable and versatile best describes our new workstation on wheels. Ideal for facilities both large and small, this affordably priced workstation can be used as a computer workstation or as a computer workstation with patient medication transport/storage.

Easy maneuverability in and out of patient rooms and hallways and quiet operation make this cart perfectly suited for BPOC applications utilizing a laptop computer and handheld or tethered barcode scanners .

- Foot pedal height adjustment allows the workstation to be adjusted to the user's height and comfort level.
- Broad range height adjustment allows the workstation to be used while seated or standing.
- Work top features an extendable worksurface for a mouse, writing, or preparation. The surface extends to the left or right for user preference.
- A pre-drilled hole with plastic insert and cover is located at the rear of the work top to control cords and guide the optional laptop cable lock.
- Large casters provide silent running and easy maneuverability.
- Compact enough to fit through doors and hallways.
- Stainless steel accessory brackets
- Easy assembly- no tools required.
- Lightweight
- Compact shipping box reduces shipping costs.

Quality Materials

- Top MDF with thermoformed PVS top and side finish - melamine back
- Extended worksurface - solid polypropylene with aluminum track'
